## **Tri-Tel Networks Explains the Importance of Taking Advantage of IRC Section 179 to Small to Mid-Sized Businesses**

*Many Companies Are Not Aware of the Tax Law that Can Impact Their Bottom Line*

SALT LAKE CITY, UT — November 26, 2008 — TriTel Networks, Inc., an industry leader in business communications, announced today that the company is educating the region's businesses on how to take advantage of significant tax deductions when acquiring new technology under Internal Revenue Code (IRC) Section 179. TriTel Networks, Inc. is placing special emphasis on Section 179 because the deductions may change under the new administration in 2009.

"Section 179 of the Jobs and Growth Tax Relief Reconciliation Act was specifically designed to give businesses the ability to increase their spending on new equipment and generate growth in order to stimulate the economy," said Jay Brown, president of TriTel Networks, Inc.. "Unfortunately, many companies are not aware of these substantial deductions and how it applies to their business. We believe it is our job as our customers' strategic business partner to educate them on Section 179 and give them the information so they can determine whether to take advantage of it in 2008."

Back on February 13<sup>th</sup>, President Bush raised the deduction limit under Internal Revenue Code (IRC) Section

179. Now, business taxpayers may generally elect to take an outright deduction of up to \$250,000 of the cost of equipment placed in service during a tax year. If the aggregate cost of qualifying equipment placed in service during the tax year is greater than \$800,000, then the deduction is reduced by \$1 for each dollar by which the aggregate cost exceeds \$800,000. For qualifying assets, the cost of which has not been deducted under Section 179, the remaining cost of the equipment is then depreciable in accordance with the ordinary tax depreciation rules.

Since February, businesses have been experiencing a tremendous push with these new changes. Those companies that are aware of the deductions are scrambling to ensure they are taking the appropriate steps, because it means hard dollars going directly to their bottom line. Surprisingly, many companies have either never heard of the law or don't know how to take advantage of it.

"During these uncertain economic times, companies must continue to change the way they conduct business and invest in technology or they will not be around much longer," added Mr. Brown. "These deductions give businesses of all sizes the ability to do just that! Many organizations haven't made a change to their voice and data

technology in quite sometime and the latest advancements have an amazing impact on profitability and productivity. Now, is the time for every organization to take a hard look at implementing new technology that will help them weather the ups and downs that our economy is likely to experience over the coming months."

### **ABOUT TRITEL NETWORKS, INC.**

TriTel Networks, Inc. is Utah's most trusted and enduring local business telephone and data Communications Company. The company was established in 1984 and continues to pursue its #1 goal, which is maximum customer satisfaction through total customer service. Tri-Tel offers its customers multiple lines of industry leading products, which are serviced by Factory Certified technicians. Customers are thoroughly trained in every component of their system by Tri-Tel's highly experienced customer service team. The company's local dispatch center delivers round-the clock service to ensure system reliability.
