Guarantee and clauses ........................................................................... 55
1.1 Phone description

1. A sensitive LED wide screen
2. Quick access to the main phones features

- **Mute key**
  During a conversation, press the Mute key to stop your caller from hearing you.

- **To adjust the loudspeaker or handset volume up or down**

- **Hands-free Loudspeaker Key**: to make or answer a call without lifting the receiver.

- **Forward**
  The forward key is blue when a forward is activated.
  Press this key to access the call application. This key flashes if there are call events that have not been picked up (unanswered calls blinking in case of non-consulted communication events such as missed calls, callback requests, new voice message, etc.)

- **Display the keyboard on the screen**

- **Alarms**
  This key lights blue when there is a wake-up alarm.

3. A Bluetooth handset for optimized communication
4. A wide speaker for optimized sound

5. **LED**
   Arrival of a new call (Flashing)

6. An adjustable and stable foot

7. One 3.5 mm headset connector

8. Good connectivity to allow phone extensions
   - A 10/100/1,000 Ethernet connection to connect to enterprise networks and a PC
   - Bluetooth
   - 2 USB connectors
   - 1 mini-USB connector for a keyboard
1.2 Screen description

1 Personal area
This area displays information on the phone user (last name, first name, number, avatar, telephone status, forward, etc.).
There are 2 parts:

Routing | Access forward programming and configuration functions
UserInfo | Information about the user

Select this area to access the user parameters and status of the phone

2 Notifications area
In idle state:
This area displays information on the latest telephone events such as missed calls, callback requests, messages, etc.
During a call:
The name of your caller and the status of the call (ongoing, on hold, incoming call) are displayed in this area. Pressing on this area during the conversation takes you back to the call screen.

- Call status
  - ✔️ Incoming call
  - 📞 Ongoing call
  - 🎵 Call on hold
  - 🗨️ Three-party conference
3 **Date, time and connectivity area**

This area displays time, date, connectivity and customization information (wake-up on, intercom mode on).

- Security mode
- Storage device connected to USB port
- Bluetooth device pairing in progress
- Bluetooth device connected (Other than your Bluetooth handset)
- Headset plugged in
- Wake-up feature activated
- Silent ring activated
- Interphony (See chapter: : Receiving intercom calls)

4 **Active area**

This area is reserved for running applications and for previews of applications selected by the user. When you start an application, it is displayed in the active zone. If no application has been launched, the active zone displays the application previews that you have preset on the homepage. One application preview allows you to view this application information and easily access it. You can view all previews of the homepage by a horizontal screen scrolling.

- Add or delete an application on the homepage
  - Select the application
  - Settings
  - Application
  - Select the application that you want to add to the homepage or delete from the homepage
  - Activate or deactivate preview mode
  - Back to homepage

5 **Applications area** (Homepage in preview mode)

This area allows access to all set applications and to different features of the running application.

6 **Applications area** (Homepage in standard mode)

You can access your phone applications from this area. Press the application button to access the application.

Once you run an application, the display is the same as the preview mode display.
1.3 Navigation

- Homepage
  The phone homepage can be in standard or preview mode. Scroll down or up your finger to get the page or menus vertically scrolling, or scroll right or left to get the page horizontally scrolling.

![Homepage in standard mode](image1)
![Homepage in preview mode](image2)

- Application
  The homepage in standard mode and the applications bar on the homepage in preview mode allow you to access the phone applications.

- Make your selection by pressing on the screen
- Go to next screen
- Back to previous screen
- Back to homepage

- Scroll applications to get the desired application
- Press the application button to access to the application
1.4 IP Touch Bluetooth Wireless handset

**LED**
Off: operating normally.
Blinking green: in communication.
Green steady: handset charging.
Orange flashing: battery charge low or handset outside coverage zone.
Orange steady: malfunction.

**Off-hook/On-hook and Volume/Mute keys**
Off-hook/On-hook: press this key to take or terminate a call

Volume/Mute:
- short successive presses to change the handset volume level (3 levels)
- long press to activate or deactivate mute mode

**Location of the battery**

If the Bluetooth handset is on its base, you do not need to press the Off-hook/On-hook key to take or terminate the call. Just off-hook/on-hook the Bluetooth handset.

To install the IP Touch Bluetooth® Handset, refer to chapter: Install the Alcatel-Lucent IP Touch Bluetooth® Wireless handset. Your Bluetooth® device needs to be prepared for pairing. Take the handset off the hook and long press on both handset buttons at the same time. You will hear a 3-note tone and the LED will flash green and orange. The default PIN code is 0000.

**Installing or replacing the Bluetooth handset battery**

1. Lift up the battery cover
2. Slide out the battery holding part

The battery recharges when the Bluetooth handset is on its base.

There is a danger of explosion if the battery is replaced incorrectly - use only the battery with the reference 3GV28041AB (1.2V 1500 mAh).
Using your telephone

2.1 Make a call

Take the handset off the hook
OR
Press the phone keyboard key
OR
Hands-free key
OR
Dialer
OR
Off-hook key on the Bluetooth handset

Dial the number for your call
Call

To make an external call, dial the outside line access code before dialing your contact number. The default outside-line access code is usually 0. However, please check this code with your administrator.

• End the call

Hang up the handset
OR
End call
OR
On-hook key on the Bluetooth handset

2.2 Make a call using the personal phone book (Contacts)

Select the application
Contacts
select the contact to call
Information regarding your contact is displayed on the screen
Press the call icon to call your contact

If there are several numbers for the same contact, select the desired number.
2.3 Using call by name

Search
Enter the first letters of your contact’s name
Ok
The names of contacts matching your search criteria are automatically displayed on the screen

Call your contact by choosing him/her in the list
If you wish you can also display your contact’s complete file

2.4 Call from call log
All incoming, outgoing, missed or unanswered calls are displayed in the call log. You can call back from your phone call log.

Select the application
History
Select the contact to call
Call

If there are several numbers for the same contact, select the desired number.
You can also access the feature by selecting the application preview History.

2.5 Call back one of the last numbers dialed

Select the application
History
From the call log, select one of the last numbers dialed
Answered outgoing call
Unanswered outgoing call
Call

You can also access the feature by selecting the application preview History.
2.6 Call a contact from the favorites application (Favorites)
Favorites: This application contains favorite contacts that you have selected in your personal directory.

Select the application
Favorites
All contacts defined as a favorite are displayed

Select the contact to call
Call

If there are several numbers for the same contact, select the desired number.

You can also access the feature by selecting the application preview Favorites.

Refer to chapter: "Define a contact as a favorite".

2.7 Answer the call

Answer call
OR
Take the handset off the hook
OR
Hands-free key
OR
Off-hook key on the Bluetooth handset

End the call

Hang up the handset
OR
End call
OR
Off-hook key on the Bluetooth handset

2.8 Ignore call
A call is received:

Ignore

Your phone no longer rings but your caller still hears the ringing tone

You can still answer the call after you have ignored it.
2.9 Forward an incoming call

A call is received: your telephone rings.

- Forward to voicemail
  - Deflect to VM
    - The call is directly forwarded to your voice mail
  - Forward to another number
    - Deflect
      - call the recipient of the transfer:
        - Search
        - OR
        - To dialer
        - OR
        - Select the recipient from the call log
      - The call is immediately forwarded

- Forward to the personal assistant
  - Deflect DVA
    - Forward to the personal assistant

2.10 Using the telephone in "Hands free" mode

You are in communication

- Hands-free key
  - Select the desired audio mode:
    - Handfree
    - Speaker (Group Listening)

*To take the call back with the handset*

- Take the handset off the hook
  - OR
  - Handset
  - OR
  - Off-hook key on the Bluetooth handset

*To go back to "handsfree" mode;*

- Press the "handsfree" key again
  - You can hang-up the handset
2.11 Receiving intercom calls (Interphony)
You can answer a call without lifting the receiver. When you receive a call, you are automatically connected in hands-free mode. The identity of the caller is displayed on the screen.

- **To answer in intercom mode:**
  
  Select the application
  Settings
  Application
  Telephony
  Interphony
  Yes / No

2.12 Mask my identity
You can hide your identity before sending your call.

Select the application
Settings
Application
Telephony
Hide identity
Yes / No
Back to homepage

2.13 Contact call log
You can display your contact’s call details (received calls, missed calls, callback requests, etc.).

Select the application
History

Select the recipient from the call log

History
List your contact’s calls (outgoing, incoming, missed, etc.)
The associated LED is on: the feature is enabled

You can also access the feature by selecting the application preview History.
2.14 Customize the call log
You can filter the calls displayed in the call log according to their type: missed calls, callback requests, received calls, etc.

Select the application
History

Filter

Select the call types that you want to display:

• **All**: all calls
• **Missed calls**: Unanswered incoming calls
• **Call back**: Callback requests

Back

Call log customization is active

The filter remains active once you have left the application.

You can also access the feature by selecting the application preview History.

Display all calls

Filter

All

Back

2.15 Delete one call log event

Select the application
History

Press the desired event

Delete

You can also access the feature by selecting the application preview History.
2.16 Delete events from the call log

Select the application
History

Delete all

Select the type of events to be deleted
• **All**: all calls
• **Missed calls**: Unanswered incoming calls
• **Call back**: Callback requests

Confirm deletion of all call log events:
Delete

If your call log contains unread events, a warning message is displayed on the screen.

If a filter is activated, you will only be able to delete events sorted by the filter.

You can also access the feature by selecting the application preview History.
3.1 Putting a caller on hold

You are in communication

On hold
Your call is placed on hold
Your caller hears on-hold music until you pick the call up again

- Recover the correspondent on hold

Select the caller on hold from the call log or the notification area

OR

Retrieve
You are back on the call with your caller

3.2 Calling a second person during a conversation

You are in communication.

Dialer

Call the second person:
Dial the number for your call

OR
From the dialpad you can call the second party by directly dialing the number or through the call log (history), the contacts, the search by name or the favorites features:

Search

History

Contacts

Favorites

Call
The first call is on hold

3.3 Switching between calls (Broker call)

You are in communication with a first correspondent
A second correspondent is on hold

Switch from one caller to another by selecting the caller on hold in the call log
You are in communication with the second contact: first call is automatically placed on hold
3.4 Transferring a call

During a conversation, to transfer the call to another number:

- You are in communication with a first correspondent

  Transfer to

  Call the recipient of the transfer:

  Dialer
  Dial the number for your call

  OR
  From the dialpad you can call the second party by directly dialing the number or through the call log (history), the contacts, the search by name or the favorites features:

  Search
  History
  Contacts
  Favorites

  Transfer
  The two correspondents are connected

- You are in communication with a first correspondent. A second correspondent is on hold. You want to connect the first caller with the second.

  Transfer
  The two correspondents are connected

3.5 Three-party conference

You are in communication with a first correspondent. A second correspondent is on hold.

Conference
You are in conference mode

During the conversation, you can:

  Leave conf
  The other participants can continue the conference without you

  End conf
  Hang up on all correspondents

  Hang up the handset
  The other participants can continue the conference without you
3.6 N-party conference (more than three)

If allowed by the system, you can establish an N-party conference (more than three callers including you).

You are in communication with a first correspondent.

Add participant

Search
OR
Dialer

Dial the number for your call

OR
From the dialpad you can call the second party by directly dialing the number or through the call log (history), the contacts, the search by name or the favorites features:

Search
History
Contacts
Favorites

Call

You are in conference mode

You can add new participants to the conference by following the same procedure.

During the conversation, you can:

End conf
hang up on all correspondents

Leave conf
The other participants can continue the conference without you

Hang up the handset
The other participants can continue the conference without you

Remove participant
You can remove a participant from the conference
You must first select the participant you want to remove from the conference
3.7 Mute, so that your correspondent cannot hear you
During the call, you do not wish your callee to hear you.

- Press your phone Mute key
  - Mute mode is activated (The key is blue)
  - Your caller can no longer hear you
- Press the key again to go back to normal mode

OR

- Long press on the Mute key on the IP Touch Bluetooth® Wireless handset
  - Press the key again to go back to normal mode

3.8 Voice frequency
During a conversation you sometimes have to send DTMF signals, such as with a voice server, an automated attendant or a remotely consulted answering machine.

- If DTMF is activated by default on your system
  - Keyboard
  - OR
  - Enter the requested codes

- If DTMF is not activated by default on your system
  - DTMF
  - Enter the requested codes

The function is automatically cancelled when you hang up.

Depending on the system configuration, the DTMF can be activated by default. For more information, contact your installer or administrator.

3.9 Recording the current conversation
When you are on a call with one or more callees, you can record the conversation.

To record the conversation during communication:

- Record
  - Recording in progress...

- Stop

The user must have the appropriate rights to use this feature.
4.1 Define a contact

Select the application
Contacts
Add new contact
Fill in the contact file.
You must provide at least a last name.
Save Contact

For an external number, enter the number directly without the outside line access code. Please use the following (canonical) format: +33 390670000.

4.2 Add a contact while on a call

You are on a call and wish to add the caller to your contacts list.

You are in communication
Add Contact
Fill in the contact file
Save Contact

If you don’t have enough time to fill in the contact file, you can do it later by modifying the contact.

4.3 Make a call using the personal phone book (Contacts)

Select the application
Contacts
select the contact to call
Information regarding your contact is displayed on the screen
Press the call icon to call your contact

If there are several numbers for the same contact, select the desired number

4.4 Modify a contact

Select the application
Contacts
Select the contact to modify
Edit
Fill in the contact file
Save Contact

You can modify a contact while you are on a call.
4.5 Delete a contact

Select the application Contacts
Select the contact to delete
Delete
Delete Contact ?
Yes

4.6 Define a contact as a favorite (Favorites)

Most frequently called contacts can be defined as a favorite. Favorite contacts are displayed in the application Favorites.

Select the application Contacts
Select the contact to add to favorites Favorites
The contact has been added to Favorites
The associated key light is on

The green light indicates that the contact has been assigned to Favorites.

To remove a contact from Favorites

Favorites
The feature associated led goes off

On the homepage, press the voice mail key

Information regarding your contact is displayed on the screen
Play VM
Listen to message
Pause VM
Pause while listening to message

Stop VM
Stop listening

When you have played the message you can:
Callback
Call back sender of message

Delete
Delete the current message

Delete all
Delete all messages

Call VM
Consulting your voice mailbox
Password
Enter your password
Follow the voice guide instructions
5.5 Define a forward

Your phone allows you to define different types of forwards.

• **Immediate forward to a number**
  All your calls are forwarded to another phone

• **Forward if busy**
  Callers can be diverted to another telephone if you are already on the line

• **Forward if no answer**
  When you are absent, all your calls are forwarded to the number of your choice (delayed forwarding on no answer)

• **Forward if busy or no answer**
  When you are absent or already in communication, all your calls are forwarded to the number of your choice (delayed forwarding on no answer or busy)

• **Immediate forward to voice mailbox**

  Press the forward key

  OR

  Press your information area in the top left corner of the screen

Routing

Add routing

Select the forward type to program

• Immediate forward
  • Forward if no reply
  • Forward if busy
  • Forward if busy or no reply

Next

Select where to forward the calls: associate, operator, voice mail, mobile or directly dialed number

Other...

Enter the forward destination number

Validate

Forward is activated (The key is blue)

The activated feature is indicated in your personal information area in the top left corner of the screen

Associate, attendant, voicemail, mobile

Save

Save the forward

Forward is activated (The key is blue)

The activated feature is indicated in your personal information area in the top left corner of the screen

The different numbers are defined in the phone parameters.

The forward key is not lit when no forward is activated.
5.6 Activate a predefined forward
Your phone allows you to activate predefined forwards or forwards that you created previously.

- Press the forward key
- OR
- Press your information area in the top left corner of the screen

Routing
The predefined forwards list is displayed on the screen

- Select the desired forward

Forward is activated (The key is blue)
The activated feature is indicated in your personal information area in the top left corner of the screen

Back to homepage

- The forward key is not lit when no forward is activated.

5.7 Cancel the forward
Forward is active (forward key lit).

- Press the forward key
- OR
- Press your information area in the top left corner of the screen

Routing
None

Back to homepage

5.8 Modify the forward
You can modify the forwards that you have programmed.

- Press the forward key
- OR
- Press your information area in the top left corner of the screen
Routing

Modify routing

Select the forward to modify
Select the forward type to program
• Immediate forward
• Forward if no reply
• Forward if busy
• Forward if busy or no reply

Next

Select where to forward the calls: associate, operator, voice mail, mobile or directly dialed number

Other...

Enter the forward destination number

Validate
Forward is activated (The key is blue)
The activated feature is indicated in your personal information area in the top left corner of the screen

Associate, attendant, voicemail, mobile

Save
Save the forward
Forward is activated (The key is blue)
The activated feature is indicated in your personal information area in the top left corner of the screen

The different numbers are defined in the phone parameters.

The forward key is not lit when no forward is activated.

5.9 Delete a forward
You can delete forwards that you have programmed.

Press the forward key

OR

Press your information area in the top left corner of the screen

Delete routing
Select the forward to delete
Yes
Confirm deletion
6.1 Change the keyboard type

While editing text, you can change the keyboard type to match the language you are writing: AZERTY, QWERTY, QWERTZ

The keyboard is displayed on the screen

Select the keypad type (AZERTY, QWERTY, QWERTZ,...)

Ok

Validate your choice

6.2 Delete a character

When editing text, you might have to correct it.

Place the cursor after the text to delete by touching the screen

Press the delete key of your keyboard

When you edit a text, you can delete several characters at once

Place the cursor before the first character to delete and, keeping your finger in contact with the screen, move to the last character to delete

Press the delete key of your keyboard

6.3 Write in uppercase

By default, the written characters are in lowercase.

Press this key once

The next character will be written in uppercase and then you will automatically switch to lowercase

Press this key twice. The associated key light is on.

Uppercase mode is used for all written characters

To go back to lowercase mode, press the key again

The associated key light is off

This green key light is on. Upper case mode is activated.
6.4 Write a number

- Press this key once
- Write a number, then the alphabetic mode is automatically reactivated
- Press this key twice. The associated key light is on.
- Write numbers
- To go back to alphabetic mode, press the key again
- The associated key light is off

This green key light is on. The numerical keyboard is locked.

6.5 Write special characters

- Press this key once
- The associated key light is on
- Select a character
- The special characters associated to the selected character are displayed
- Select the desired character
- Press this key again to go back to the standard keyboard
- The associated key light is off
7.1 Define the phone language

The selected image is set as wallpaper
7.27 Phone screensaver

You can change your phone screensaver to a default or a personal screensaver. The default screensaver uses predefined images. The personal screensaver uses images you have stored in your phone memory and set up in a screensaver pool.

- Select the application
  - Settings
  - Application
    - Screensaver
      - Screensaver: yes / no
        - Enable or disable the feature
      - Screensaver type:
        • Default screensaver
        • Personal screensaver

You can set the screensaver timeout, the backlight timeout, the brightness when the backlight is on or off and the refresh images interval.

- Add an image for your personal screensaver
  - The images have to be stored in the phone memory.

- Remove an image from your personal screensaver pool
  - The image is removed from your personal screensaver pool
7.28 Customize the user picture
You can change the picture displayed in your personal information area in the top left corner of the screen. The image must be stored in the set or on a USB storage device.
If the image is on the USB storage device, you must connect it to the phone:
- Insert your USB device at the back of the phone
- The icon is displayed (connectivity information zone)
Change the avatar:
- Select the application
  My files
  Picture
  The list of available pictures is displayed
  Filters
  Display the files for the selected storage device
  Select the image
  My picture
  The picture is updated

The recommended size for the avatar is 100x100 pixels.

7.29 Configure your homepage
You can configure your homepage according to your needs and calling habits.
You can display many applications on the homepage such as your history, contacts, favorite contacts, etc.
The phone homepage can be in standard or preview mode
- Homepage in standard mode: Only application access keys are displayed on the homepage

- Homepage in preview mode: The application access keys and some application previews are displayed on the homepage
Choose the homepage layout

Select the application
Settings
Application
Homepage

Homepage
Standard: Homepage in standard mode
Preview: Homepage in preview mode

7.30 Change the theme of your phone

Select the application
Settings
Device
Phone configuration

Select the current theme in the configuration page
The available theme list is displayed on the screen
Select the desired new theme from the list

Ok
Confirm the selection

Changing the theme may take a few seconds.
8.1 Manager/Assistant

The manager/secretary application is a special configuration of at least two multiline stations offering specific additional features via programmable keys. On each manager/assistant phone, a dedicated application window shows the name of the manager or assistant, the phone presence of the manager or the assistant, the direct call feature access button and the filtering mode access button. The assistant/manager application window can only be displayed when homepage is in preview mode.

- **Assistant station**
  - **Call**
    - Call your manager
    - If you are already on a call, the first caller is placed on hold
  - **Filter**
    - Enable ManagerAssistant filtering and call monitoring

- **Manager Station,**
  - **Call**
    - Call your assistant
    - If you are already on a call, the first caller is placed on hold
  - **Filter**
    - Enable ManagerAssistant filtering and call monitoring

- On both sets the header of the dedicated assistant/manager application shows the phone presence of the assistant or manager and the filtering mode activated

  - The assistant or the manager is on a call with a contact
  - The assistant or the manager is not on a call with a contact

8.2 Select and activate the filtering mode between the manager and assistant phones

The filtering mode allows the assistant and the manager to choose how to route and monitor incoming calls to the manager.

- **Mode**
  - Select the filtering mode to activate
  - Filtering is activated on the Manager and the associated Assistant phones

There are four filtering modes.

- Manager doesn’t receive the calls and Assistant receives them
- Manager monitors the calls & Assistant receives them
- Manager receives the calls & Assistant monitors them
- Off

- **Manager doesn’t receive the calls and Assistant receives them**
  - When a caller is calling the Manager phone, the call is directly forwarded to the Assistant phone if the caller is not a priority caller (not registered on the "White list").
Manager monitors the calls & Assistant receives them
When a caller is calling the Manager phone, the call is directly forwarded to the Assistant phone if the caller is not a priority caller (not registered on the "White list"). In this filtering mode, the manager is notified of the incoming call routed to the assistant. If necessary, the manager can pick up the incoming call before the assistant answers the call. The assistant can see the name of the caller in the history preview pane and the manager’s presence status changes to "busy".
The manager picks up the incoming call:

- Monitored call
- Control
- Answer displayed call

Manager receives the calls & Assistant monitors them
In this filtering mode, the assistant is notified of the incoming call on the manager phone. If necessary, the assistant can pick up the incoming call before the manager answers the call.
The assistant picks up the incoming call:

- Monitored call
- Control
- Answer displayed call

Off
The manager/assistant feature is deactivated. There is no routing and monitoring between the two phones.

8.3 Transfer a call to the manager phone
When on a call, the assistant can directly transfer the call to the manager.
The assistant is on a call
To manager
The call is forwarded to the manager

8.4 Define a priority number ("White List")
A registered number in the "White List" is a priority number. A priority number will always directly reach the Manager phone even if a call filtering mode is activated.

Only the manager set can add a priority number

- You are on a call. You wish to add your contact to the list.
  If the "White List" button is green, it means that your contact is already registered and you do not need to add the contact to your "White List".

White List
The contact is added to the list
The "White List" green light is on.
You are not on a call. You wish to add a contact to the list.

Settings  
Application  
White List  
Add Contact  
Enter the first letters of the name, name-first name or the initials of your correspondent  
Select your correspondent from the list  
The contact is added to the list

8.5 Delete a priority number ("White List")

You are on a call. You wish to remove your contact from the White list. The "White List" green light is off.

White List  
The contact is removed from the list  
If the "White List" button is not green, it means that your contact is not registered so you do not need to remove them from your "White List".

You are not on a call. You wish to remove your contact from the White list.

Settings  
Application  
White List  
Delete  
The contact is removed from the list
9.1 Introduction
This application is for synchronizing your address book between your phone and your PC Outlook application. The default maximum number of contacts you can synchronize between your phone and your PC is 500. However, your administrator can increase this to up to 1,000. Please ask your administrator for the maximum number of contacts.

9.2 Prerequisites
- The supported operating systems are:
  - Microsoft® Windows® XP Service Pack 2 and higher (32 bits)
  - Microsoft® Windows® VISTA (32 bits and 64 bits)
  - Microsoft® Windows® 7 (32 bits and 64 bits)
- The minimal system requirements are:
  - Processor: P4 Class or higher
  - RAM memory: at least 256 Mo
  - Minimum available disk space: 100 Mo
  - Screen: 800x600 True Color
  - Network card is required

9.3 Installing the application on your PC
The application comes as an executable installation file (.exe).
1) Run the application executable file
2) Select the language: this defines the installation and the application language
3) Read and agree the license Agreement
4) Select the application destination folder on your PC (make sure you have the necessary administration rights to install the application in the selected folder).

5) Follow the installation steps.

9.4 Uninstalling the application
There are two different ways for uninstalling the application:
• Access the feature "Add/remove programs" (Windows® XP) or "Programs and features" (Windows® Vista ou Windows® 7).
• Run the installation executable file and select the "Remove" option.

9.5 Repairing the application
If the application becomes corrupted, you can repair it.
1) Run the application installation executable file.
2) Select the "Repair" option.
3) Follow information displayed on the screen.
9.6  Configuration

Configuring the application on the PC.

The application is ready to work but it is recommended to check the application default configuration.

1) Open the application configuration : in the task bar of your PC, select the "Settings" menu of the synchronization menu.

2) You can define :

- The profile and the Outlook folder to use for synchronizing contacts. The default profile and Outlook folder will be used for synchronizing unless you specify a folder and profile. You can change the profile and folder used. You can define a profile for synchronizing the contacts. You are advised to create an Outlook subfolder dedicated to your phone contacts and to work from this folder. This will help protect your general Outlook contacts on your PC.
- Date range for synchronizing: only events during this period will be synchronized.
- The conflict policy (determines how the application should behave when different changes have been made on the phone and the PC)
  - the most recent modification replaces the oldest,
  - the phone datas always replace the ones on the PC,
  - the PC datas always replace the ones on the Phone,
  - the modified datas on the phone are copied on the PC and modified datas on the PC are copied on the phone (the datas are duplicated),
  - no synchronisation is done.
- The silent sync : you can choose to display or not the synchronization progress bar and the synchronization summary.
- The port used by PC for synchronization : if default port cannot be used on the PC you can change it. If you modify the port used by the application, you have to do the same modification on the phone side.
- URL for downloading the application updates.
- Startup: if enabled, the application will be run when Windows® starts

Besides Settings item, there are a few item that allow you to display the last synchronization summary, to create or delete a pairing between your phone and your PC, to open the application online help, to display information on the application version or to exit the application.
Configuring the phone

- **Settings**
- **Application**
- **Synchronization**

**Server address**
Enter the IP address or the complete network name on which the synchronization application is installed.

**Server port**
This data defines the port used on the PC for synchronization. The port must be the same as the one filled in the PC application.

**Warning when exceed**
Choose if you wish to be informed when a maximum number of items for synchronization is reached (the default setting is 500 items but this may have been changed by the administrator - ask your administrator for the maximum number of contacts).

**Sync. button**
Choose to display the synchronization button in the applications bar of your My IC Phone.

Back to homepage

If you try to start the synchronization before configuring it, you will access the Synchronization settings.

9.7 Synchronize your phone and your PC

- **Start synchronization**

  - **Synchronization** *(if enabled in the synchronization settings)*
  - OR
  - **Settings**
  - **Application**
  - **Synchronization**
  - **Synchronization : start**

If not deactivated in the application configuration (Silent Sync) you can see the synchronization summary on the screen.

During the synchronization, you can at anytime:  
- see synchronization progress and phases,  
- display details of synchronized items,  
- cancel the synchronization.

The synchronization summary lists all the synchronized items.

From the application menu on the PC (Task bar), you can see at anytime the summary from the last synchronization.
Pairing your phone and your PC
When you run the synchronization for the first time, you must pair your phone and your PC.
1) Accept the certificate required by the phone (ensure that the certificate comes from the target PC),
2) A pairing PIN code (PIN) is displayed on the phone screen.
3) The phone is detected by the PC and you are prompted to enter this PIN code and a name for the pairing.
4) The synchronization is automatically started when the pairing is established.

- This pairing has to be done only for the first synchronization.
- From the PC application menu, you can delete this pairing.

Synchronization
During the synchronization, you can monitor progress and view the summary once the process is completed. Make sure this option (“Silent Sync”) is configured correctly in the Synchronization settings on the PC side. You can also see which items are modified and where by clicking on the detailed view button.

- Synchronization takes about 15 seconds for 500 contacts. You can receive and make calls during synchronization but this can make the synchronization process longer.
- The synchronization function is most commonly used to synchronize your PC Outlook contacts with your phone contacts list. Once you have run the initial synchronization, if you delete a contact from the phone contacts list, the contact will be deleted from Outlook during the next synchronization (and vice versa). You are advised to create an Outlook subfolder dedicated to your phone contacts and to work from this folder. This will help protect your general Outlook contacts on your PC.

9.8 Troubleshooting
Below is a troubleshooting guide that can help you resolve any problems that might occur.

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Solutions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Installation says you do not have write permissions in this folder</td>
<td>You are probably not permitted to change the folder in which you are trying to install PC Sync. Try installing it in another location.</td>
</tr>
<tr>
<td>Phone displays &quot;HTTP error, HTTP request failed&quot;</td>
<td>Please make sure PC Sync is started in the PC. Please check if the same port is set on the phone and on the PC. Please check you correctly entered PC address. Please check your firewall settings. The port may be closed by the firewall. Try to change the port.</td>
</tr>
<tr>
<td>PC Sync displays &quot;Unable to listen to the port&quot;</td>
<td>Please make sure no other applications are using this port. Please make sure the firewall allows listening to this port. Try to change the port.</td>
</tr>
<tr>
<td>PC Sync displays &quot;Selected folder has been deleted&quot; or &quot;Cannot open Outlook profile&quot;</td>
<td>The profile or the folder that My IC Phone Synchronizer is configured to synchronize with has been deleted. Select another profile or folder in settings.</td>
</tr>
<tr>
<td>PC Sync displays &quot;Outlook is not installed&quot;</td>
<td>My IC Phone Synchronizer could not find a supported version of Outlook on the PC. Install Outlook.</td>
</tr>
<tr>
<td>PC Sync displays &quot;Error communicating with Outlook&quot;</td>
<td>My IC Phone Synchronizer could not communicate with Outlook. This might be because Outlook has been installed but not yet set up properly or is malfunctioning. Starting Outlook itself may provide information on what is wrong.</td>
</tr>
</tbody>
</table>
Safety Instructions

- Changes or modifications to the equipment not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

- Intellectual Property Rights
  When released from the manufacturing plant, the audio files hosted on My IC Phone are Alcatel-Lucent property and can be used as is. When an installer or End-User downloads MP3 files via a USB link, they are responsible for the Intellectual Property Right requirements related to such downloads.
  To limit the risk of interference, people with pacemakers must keep the wireless telephone away from their equipment (minimum distance of 15 cm).
  It is recommended to follow the standard acceptance procedures before using this equipment in human safety critical areas (hospitals...).
  The headset includes magnetic elements that may attract sharp metallic objects.
  There is a danger of explosion if the battery is replaced incorrectly - use only the battery with the reference 3GV28041AB (1.2V 1500 mAh) 3GV28041AB (1.2V 1500 mAh) (Bluetooth Handset only).
  Battery charge (Bluetooth Handset only) : Charge the battery for about 16 hours before initial use.

Regulatory Statements

EU/EFTA
This equipment is in compliance with the essential requirements of R & TTE Directive 1999/5/EC. The Declaration of Conformity may be obtained from your installer.

USA and Canada
This device complies with Part 15 of the FCC Rules and with RSS-210 of Industry Canada. Operation is subject to the following two conditions : (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules and ICES-003 of Canada. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try correct the interference by consulting the dealer.

Exposure to Radio Frequency Signals.
This device has been designed and manufactured not to exceed the SAR (Specific Absorption Rate) radio frequency power transmission limits established by the different countries concerned. The SAR value for the Bluetooth handset is 0.09 W/kg (the globally accepted maximum limit being 1.6 W/kg).
User Instructions
Only use the handset in temperatures between -5°C to +45°C (23°F to 113°F).
This apparatus is Hearing Aid Compatible (HAC).

Acoustic shock protection
The acoustic level of the signal generated by the handset earpiece is less than 130 dBSPL for a transient signal (123 dBSPL for Australia) and less than 118 dBSPL (rms) for a continuous signal (120 dBA for Australia).

Directive 2003/10/EC specifying the risks inherent in noise at work
The ring contributes towards overall daily noise; at its maximum setting, the level is 105 dBA at 60 cm from terminal.
To reduce the level, the following is recommended:
- reduce the setting (9 levels of 5 dB)
- program a progressive ring.

This device can be used for indoor operation in all the countries; you must consult your installer for an outdoor usage.

Privacy
Privacy of communications may not be ensured when using the Bluetooth handset or any additional Bluetooth device

Disposal
The equipment must be returned to a collection point for electronic equipment waste disposal.
Defective batteries must be returned to a collection point for chemical waste disposal.
