TriTel Networks Deploys Advanced Managed Browser Security to Protect Clients from Human Error and Online Threats

Leading MTSP Introduces Revolutionary Web Protection That Keeps Organizations Secure, Productive, and Free from Digital Risk

SALT LAKE CITY, UT – June 25, 2026 - TriTel Networks, a leading managed technology services provider (MTSP), announced today the rollout of a cutting-edge browser security solution designed to dramatically reduce cybersecurity risks with its advanced managed browser security. With “human error” still being the #1 cause of data breaches in small to mid-sized businesses, organizations are looking for ways to reduce this liability by preventing employee mistakes from occurring in the first place with web-safe tools and TriTel Networks’s latest advancement is helping to accomplish just that.

TriTel Networks’s “safe browsing” experience gives organizations the ability to proactively block malicious content, phishing sites, and harmful web destinations before they ever reach employees, making it a powerful, preventative first line of defense. Strict filtering enables employees to freely utilize the power of the internet, artificial intelligence (AI) and key software without incurring unnecessary organizational risk. While many organizations’ first line of defense

is complete reliance on everyone’s constant vigilance, TriTel Networks’s safe browser complements that awareness with a tool that scales and operates autonomously.

“The web browser is the most used and most vulnerable tool in any organization,” said Amy Duncan, President at TriTel Networks. “While phishing emails are sometimes easier to detect, this technology allows us to protect our clients from the vast majority of web-based threats without relying on every individual employee to make the right call every single time.”

Domain Name System (DNS) filters out dangerous websites, downloads, and suspicious content. It quietly works behind the scenes, preventing access to risky destinations while allowing safe, approved content to load without interruption, so team members can research, collaborate and grow without risking organizational credentials.

While “safe browsing” is one of the main features of this technology, there are several other aspects of TriTel Networks’s broader push to enable proactive, preventative cybersecurity within small to mid-sized organizations.

- **Web Threat Prevention:** Automatically blocks access to malicious or inappropriate websites, phishing scams, and domains associated with malware or ransomware.
- **Human Error Protection:** Removes the guesswork from employee decision-making by filtering threats before they appear in the browser.
- **Password Management & Credential Safety:** Ensures company logins are securely stored and managed, reducing the risk of password reuse or accidental credential exposure. The password manager eliminates password reuse across apps and keeps credentials secure even on shared devices.
- **Distraction Reduction & Productivity Boost:** Helps organizations control which websites are accessible, limiting access to non-work-related content that impacts focus.

As organizations grow increasingly dependent on cloud-based platforms and web apps, secure browser environments are

no longer optional—they're essential. From protecting sensitive data to reducing the likelihood of ransomware attacks, this technology acts as an invisible but essential layer of armor around the modern workplace.

"You can't rely on employee training alone to prevent every mistake," added Duncan. "While education is also necessary, we've seen that the most effective security should be automatic, non-invasive, and effective. That's what we're offering our clients now—a tool

that protects their business without slowing them down."

ABOUT TRITEL NETWORKS, INC.

TriTel Networks, Inc. is Utah's most trusted and enduring local MSP & VoIP Services Provider, having just celebrated 40 years in the Valley. TriTel is a family owned and run business, becoming Women Owned in the 2nd generation. Since 1984, our core values have remained the same as

we continue to pursue our #1 goal of maximum customer satisfaction with a focus on increasing productivity and profitability of our clients. TriTel offers industry-leading products, serviced and trained by Factory Certified technicians & customer service representatives. Our local dispatch center delivers round-the-clock service to ensure system reliability. For more information on TriTel Networks, Inc., call (801) 265-9292 or visit www.tritel.com.
