## **TRITEL NETWORKS Disrupts Cybersecurity Industry with New Program**

*Leading Managed Technology Services  
Provider Streamlines  
Security Options for SMBs*

SALT LAKE CITY, UT – February 24, 2023 - TriTel Networks a leading managed technology services provider, announced today that the company has launched a cybersecurity security-as-a-service program designed to protect businesses from daily attacks. TriTel Networks's cybersecurity-as-a-service is an all-inclusive offering that combines best of breed technology for firewalls, antivirus software, phishing prevention, dark web monitoring, and data backup.

TriTel Networks begins every customer relationship by formulating strategic IT goals, planning their IT budget, analyzing and reworking business processes and facilitating technology changes. The objective is to maintain the IT infrastructure and protect customers from cyber-attacks that occur on a daily basis. The cybersecurity-as-a-service program creates security policies, controls and cyber incident response planning, ensures compliance with the changing laws and applicable regulations, and maintains a

current understanding of the IT threat landscape.

TriTel Networks's cybersecurity-as-a-service program is an all-encompassing offering making it unique versus what other IT companies provide in the marketplace.

TriTel Networks has a proven process that includes unified threat management protection, a network analysis and scorecard, a risk summary report that identifies critical issues, an asset detail report that catalogs specific workstations, servers and devices, a phishing simulation report to educate employees on what to look out for from an attack, a dark web report to determine which employees' emails and passwords have been compromised, and network security and risk monitoring system. These are just a few of the important components provided through the cybersecurity-as-a-service program. Each is designed to proactively thwart cyber-attacks.

"Cyber-attacks are on the minds of every owner and unfortunately most small to mid-sized business (SMBs) are extremely vulnerable," stated Jay Brown, President of TriTel Networks. "This vulnerability

could put many of them out of business if nothing is done. We created our cybersecurity-as-a-service program to cost effectively provide enterprise level protection to our region's SMBs," added Mr. Brown."
