TriTel Networks Takes the Lead in Transitioning Customers' IT Networks to Microsoft Azure

Leading Managed Technology Services Provider Helps Organizations Take Advantage of the Economic and Productivity Benefits of Moving to the Cloud

SALT LAKE CITY, UT – October 27, 2026 - TriTel Networks, Inc., a leading managed technology services provider (MTSP), is helping organizations transition their IT networks to Microsoft Azure. TriTel Networks is empowering organizations to leverage the economic and productivity benefits of moving their network to the cloud. With growing IT complexity, rapid AI innovation and strong demand for flexible hybrid work environments, TriTel Networks is helping to navigate this transition as efficiently, productively, cost-effectively, and profitably for their customers.

"The days of managing bulky on-premise servers have long been over," said Amy Duncan, President at TriTel Networks. "The maintenance costs, cybersecurity risks, obsolescence and restrictions that on-premise IT infrastructure pose is no longer a liability business owners need to tolerate. Small to mid-sized businesses (SMBs) and non-profits are moving to Azure because there's no need for them to host physical servers. More than ever, organizations are searching for ways to reduce operating costs, speed up the pace of collaboration and give their team more flexibility to accomplish their work, in a way that works for their lives. While the cloud has been nascent technology in years past, we've now reached the point in its development where it's simply a superior technology and we foresee it enveloping on-premise servers."

By moving to Azure, organizations no longer need to invest in physical servers, expensive leases or security efforts to secure them. This translates into significant cost savings and opens the door to a more agile IT environment. Additionally, Azure eliminates the problem of scattered data, enabling seamless collaboration across tools which integrate with everything that staff are already familiar with. While cost-efficiency and collaboration are most obvious explanations for why so many organizations are switching to Azure, the most significant reason is because of how it bolsters cybersecurity. Everyone can now leverage all the resources that Microsoft is pouring into cybersecurity. In fact, Microsoft has committed to invest $5 billion and also employs over 5,000 security professionals who are constantly figuring out ways to improve cybersecurity for every user. Since Microsoft has more resources and expertise at their disposal, organizations can expect to enjoy superior uptime and reliability which will far exceed any individual business's capacity to deliver.

The shift to Azure aligns with key organizational objectives —like reducing large capital expenditures, improving collaboration and building a flexible infrastructure. Duncan also added, "When customers realize they're already paying for Microsoft 365 licensing and can access premium tools without the burden of maintaining hardware, the choice becomes clear.".

Their team is dedicated to guiding organizations through their transition to the cloud, ensuring a smooth process that prioritizes uptime, data security, and business continuity. Their focus is on simplifying networks, minimizing customer responsibilities, and equipping business owners with IT systems that can grow without constraints.

"With Azure, organizations aren't just upgrading their IT infrastructure; they're future proofing it," said Duncan. "We're excited to help unlock the power of the cloud, enabling all to achieve more with less."

ABOUT TRITEL NETWORKS, INC.

TriTel Networks, Inc. is Utah's most trusted and enduring local MSP & VoIP Services Provider, having just celebrated 40 years in the Valley. TriTel is a family owned and run business, becoming Women Owned in the 2nd generation. Since 1984, our core values have remained the same as we continue to pursue our #1 goal of maximum customer satisfaction with a focus on increasing productivity and profitability of our clients. TriTel offers industry-leading products, serviced and trained by Factory Certified technicians & customer service representatives. Our local dispatch center delivers round-the-clock service to ensure system reliability. For more information on TriTel Networks, Inc., call (801) 265-9292 or visit www.tritel.com.
